

**"phase3\_data.csv"**

## **EDA Final Project Data, Team 9**

### **Description**

The following is a codebook that serves as a data dictionary for all the variables used for Phase 3 of the final EDA project by Team 9. The complete data is presented as a table in the "phase3\_data.csv" file. The primary key for this table is the year variable. The data has been collected from the MacroTrends website (please see the references page in the final report for proper citations).

<b>Variable</b>	<b>Description</b>
year	Each observation is one of the years from 1990 to 2019.
Country	Each observation is one of four possible countries: Belarus, South Sudan, Uganda, or Ukraine.
Death_Rate	The recorded death rate due to heart disease for the corresponding country in the corresponding year.
